News

Job Openings: Policy Director and Maine Projects Director

The Northern Forest Alliance, an 18 year-old coalition of more than 50, conservation, recreation, and forestry organizations working to protect and enhance the human and natural communities of the Northern Forest region, is looking to fill two critical staff positions. We are now in the final stages of attracting interested and qualified applicants before closing the application period on September 30th. Please distribute this email and its attachments to anyone who you think would be a good fit for one or both of these jobs.

Policy Director - In general, this person is responsible for leading and managing the Alliance's multi-partner public-private strategies to secure public funding to support land protection and community revitalization in the Northern Forest. Please see the attached job description for more details.

Maine Projects Director - In general, this person is responsible for advancing the Alliance's local, state, and federal initiatives in Maine and coordinating the activities of the Maine Caucus of the Northern Forest Alliance. Please see the attached job description for more details.

CANUSA: Eastern Forest Science Conference

Eastern CANUSA
Forest Science
Conference

October 17-18, 2008
University of Maine
Orono, Maine

The 4th biennial Eastern CANUSA Forest Science Conference will be held **October 17-18, 2008** on the University of Maine campus in Orono. We are **seeking oral and poster presentations** from all scientists and students in the Northeastern U.S. and Eastern Canada who are working on forest related problems that address any of the following themes:

- Forest Ecology & Wildlife
- Silviculture & Forest Production
- Forest Management, Planning, & Policy
- Forest Social Science & Recreation
- Wood Products & Forest Operations/Engineering

The purpose of this conference is to **promote cross-border communication among US and Canadian forest researchers** and **provide a forum for graduate and undergraduate students working on forest-related problems** to present their research findings, meet other forest scientists and students working on similar problems, and become educated about northern forest issues.

[Registration](#) is now open and FINAL Call for Papers!

To Register for the conference: [register](#) through the University of Maine Conference Service Division.

To Submit a presentation: Fill the [online form](#) to submit your presentation information and abstract. Presentations are accepted through September 19, 2008.

Science

2C1Forest Synthesis report

The activities of human beings have a significant impact on the natural world. The extent and intensity of our "Human Footprint" has been mapped for the Northern Appalachian/Acadian Ecoregion by the Wildlife Conservation Society Canada in partnership with Two Countries, One Forest.

In an effort to increase our members' knowledge of the ecoregion, we will strive to send out 2C1Forest News and Science in the Northern Appalachian/Acadian Ecoregion on a regular base. To this end, please send your ecoregional related news and science to [Chantal Gagnon](#). Thank you.

Visit the 2C1Forest website (www.2c1forest.org) to learn more about 2C1Forest and the conservation work that is going on across the ecoregion.
